

Subject: MKP series capacitor labeling change

Illinois Capacitor has added the voltage rating of 310 VAC for agency approvals in the MKP series.

The labeling on the MKP series of capacitors has been changed to show the updated voltage rating.

There is no change to form, fit or function of the part. This is a labeling change only. Parts remain approved for 250 VAC and 275 VAC applications.

Previous format

New format

The new labeling format will be implemented on all products with production dates starting on October 1, 2014.

Both labeling formats may be included in shipments.
